Abstract not available for EP 2079322 (A1)

Abstract of corresponding document: **WO 2008046895 (A1)**

The present invention relates to the use of a compound of the Formula (I) wherein: R<1>, R<2>, R<3>, R<4>, R<5>, R<6>, R<7> and R<8> denote in each case independently of one another hydrogen, an alkyl radical with 1 to 6 C atoms, or an alkenyl radical with 2 to 6 C atoms, with the proviso that at least one of the radicals R<1>, R<2>, R<7> and R<8> and at least one further of the radicals R<1>, R<2>, R<3>, R<4>, R<5>, R<6>, R<7> and R<8> are not hydrogen, wherein independently of one another also two of the radicals R<1>, R<2>, R<3>, R<4>, R<5>, R<6>, R<7> and R<8> can together denote a bridge with one or more bridge C atoms; Y<1> and Y<2> denote independently of one another hydrogen, methyl or ethyl; and R<a> and R denote independently of one another hydrogen, an alkyl radical with 1 to 6 C atoms, an alkenyl radical with 2 to 6 C atoms or a cycloalkyl radical with 3 to 6 C atoms as a food flavor substance.
